Site Visit

We arrange in coordination with client for site visit to determine the nature of the site and highlighting the environment parameters which will play an important role in the selection of the light fixture used. What's more highlighting the location such as:

- Ways
- Corridors
- Rooms
- Restaurants, ect

After site survey we recommend the suitable lighting fixture matching with the location of application. Each product facility can serve the field application through using the luminary lighting parameters with specific laying conditions and environmental conditions, hence we can obtain a unique combination and homogeneous of the lighting schemes of the project.
